1

To review how to recruit and screen a potential study participant,  
please see the previous mini-webinar on:  
"Baseline Procedures: Recruiting and Screening Patients"

To review how to consent and enroll a potential study participant,  
please see the previous mini-webinar on:  
"Baseline Procedures: Consenting and Enrolling Patients"

2

### 1. Provide Asthma Education to Patient

- As this is a real-world ('pragmatic') clinical trial, provide education according to your own practice
- Educational resources on asthma available website for both patients and pharmacists

3

### 2. Inform Patient of "Next Steps"

Over the next year, patients will be followed-up by our UBC research team according to the schedule below

4

### 2. Inform Patient of "Next Steps"

Over the next year, patients will be followed-up by our UBC research team according to the schedule below

5

### 2. Inform Patient of "Next Steps"

Over the next year, patients will be followed-up by our UBC research team according to the schedule below

6

### 3. Provide Patient with Resources

- Before the patient leaves the pharmacy, make sure they have:
  - 1 copy of the **Participant Guide**
  - 1 copy of their signed **Subject Information and Consent Form** (stapled copy)
- Remind patients they are able to visit the EmPhAsIS website for more information and resources for patients
