Empowering Pharmacists in Asthma management through Interactive SMS

To review how to recruit and screen a potential study participant,  
please see the previous mini-webinar on:

**“Baseline Procedures: Recruiting and Screening Patients”**

To review how to consent and enroll a potential study participant,  
please see the previous mini-webinar on:

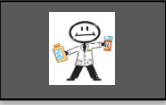

**“Baseline Procedures: Consenting and Enrolling Patients”**

# 1. Provide Asthma Education to Patient

- As this is a real-world ('pragmatic') clinical trial, provide education according to your own practice
- Educational resources on asthma available website for both patients and pharmacists

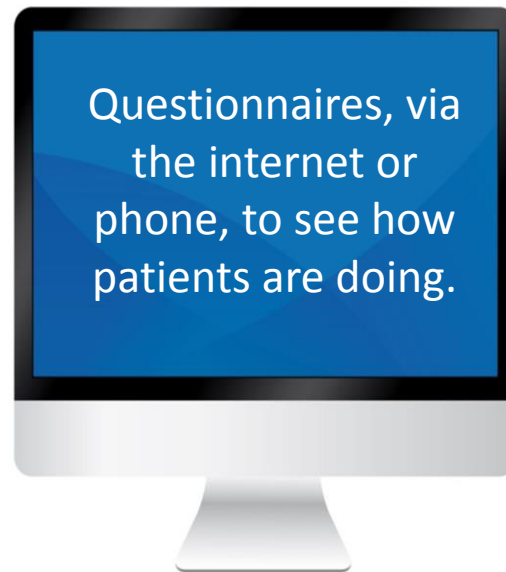

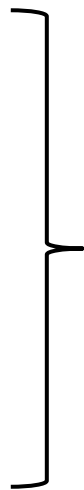

## 2. Inform Patient of “Next Steps”

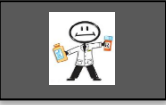

Over the next year, patients will be followed-up by our UBC research team according to the schedule below

**Month 0**

**6**

**12**

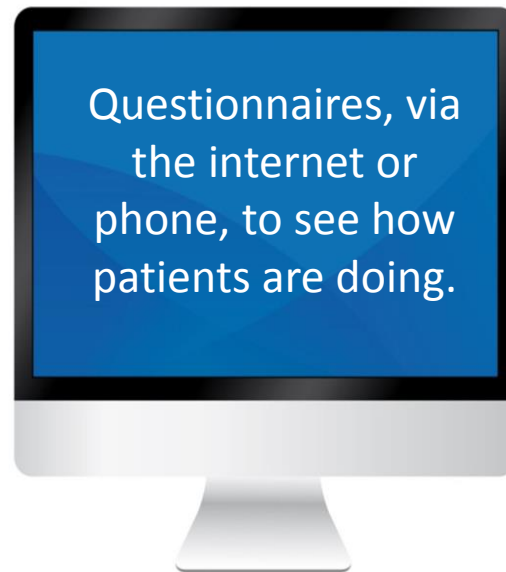

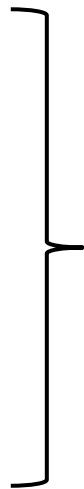

## 2. Inform Patient of “Next Steps”

Over the next year, patients will be followed-up by our UBC research team according to the schedule below

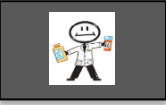

**Month 0**

**6**

**12**

Patients will receive a \$25 honorarium at the end of the study

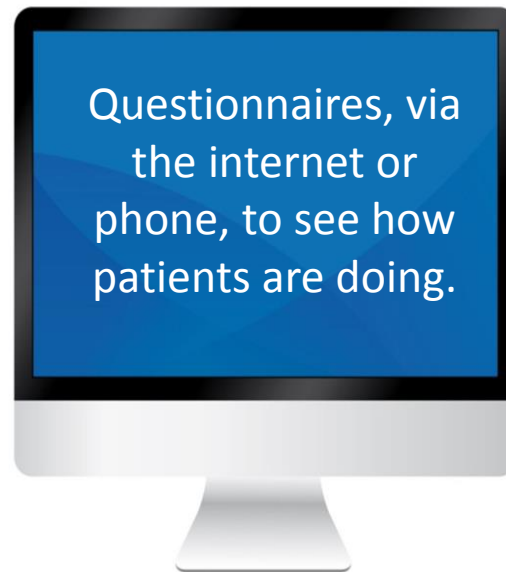

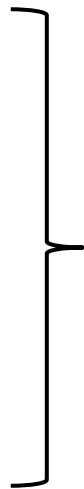

## 2. Inform Patient of “Next Steps”

Over the next year, patients will be followed-up by our UBC research team according to the schedule below

**Month 0**

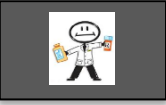

**6**

**12**

Patients will receive a \$25 honorarium at the end of the study

At the end of the study, patients have the opportunity to receive automated monthly assessment of adherence by text messages for 12 months

### 3. Provide Patient with Resources

- Before the patient leaves the pharmacy, make sure they have:
  - 1 copy of the **Participant Guide**
  - 1 copy of their signed **Subject Information and Consent Form** (stapled copy)
- Remind patients they are able to visit the EmPhAsIS website for more information and resources for patients
